

BSTI Post-COVID-19 CXR Report Codes

COVID-19-related Findings

Resolved (PCVCX0)

Normal/No significant persisting COVID changes/Return to Pre-COVID baseline

Significantly improved (PCVCX1)

≥ 50% abnormalities have resolved (extent and/or density of opacification)

Not significantly improved or unchanged⁺ (PCVCX2)

< 50% abnormalities have resolved (extent and/or density of opacification)

Worsening⁺ (PCVCX3)

Development of fibrosis, even if alveolar opacity has improved/Deteriorating alveolar opacity

Other findings

(PCVCX4)

Lung malignancy⁺; Pneumothorax; Pneumomediastinum; New non-COVID-19 infection / Pleural effusion(s)

* If any suggestion of malignancy refer to cancer services as per local pathways
